DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-12, drawn to combustion system, classified in class 431, subclass 268.
 - II. Claims 13-14, drawn to reformer system, classified in class 48, subclass 127.9.
 - III. Claims 15-16, drawn to fuel cell system, classified in class 429, subclass 19.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as for synthesis gas production and invention III has separate utility such as for electricity production. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Because these inventions are distinct for the reasons given above and the search required for Groups II and/or III is not required for Group I, and further, search required for Groups III is not required for Group II, restriction for examination purposes as indicated is proper.
5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1764

6. If, in fact, the applicant elects either Group II or III, either claim 13 or 15, respectively, has to be rewritten in independent form in response to this office action.
